Subject Index of Volume 90

Absolute configuration
synthesis and characterization of homochiral polymeric *S*-malato molybdate(VI): toward the potentially stereospecific formation and absolute configuration of iron-molybdenum cofactor in nitrogenase, 137
Acute exposure
oxidative stress in toadfish (*Halobactrachus didactylus*) cardiac muscle. Acute exposure to vanadate oligomers, 159
Alcohols
solvent effects on the stability of nifuroxazide complexes with cobalt(II), nickel(II) and copper(II) in alcohols, 67
Alumina
preferential amino acid sequences in alumina-catalyzed peptide bond formation, 1
Amino acids
preferential amino acid sequences in alumina-catalyzed peptide bond formation, 1
Antibacterial
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
Antifungal
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
Antimetabolite
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
Antimetabolite chelate
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
Antioxidants
investigation of the release of iron from ferritin by naturally occurring antioxidants, 18
Antiproliferatives
synthesis, characterization and X-ray structures of new antiproliferative and proapoptotic natural aldehyde thiosemicarbazones and their nickel(II) and copper(II) complexes, 113
Antitumor
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
differential genotoxic effects of antitumor *trans*-[$PtCl_2$(*E*-iminoether)$_2$] and cisplatin in *Escherichia coli*, 155
Antitumor activity
synthesis, crystal structure, antitumor activity and DNA-binding study on the Mn(II) complex of 2*H*-5-hydroxy-1,2,5-oxadiazo[3,4-f]1,10-phenanthroline, 79
Bleomycin
kinetics of reaction of DNA-bound Fe(III)bleomycin with ascorbate: interplay of specific and non-specific binding, 8
Cadmium
studies on the interaction between Cd^{2+} ions and DNA, 85
studies on the interaction between Cd^{2+} ions and nucleobases and nucleotides, 97
Carboxamidrazone
metal complexes of carboxamidrazone analogs as antitubercular agents. 1. Synthesis, X-ray crystal-structures, spectroscopic properties and antimycobacterial activity against *Mycobacterium tuberculosis* H_{37}Rv, 127
Carcinogen
studies on the interaction between Cd^{2+} ions and DNA, 85
studies on the interaction between Cd^{2+} ions and nucleobases and nucleotides, 97
Casein micelle
three kinetically different inorganic phosphate entities in bovine casein micelles revealed by isotopic exchange method and compartmental analysis, 61
Chromatography
fractionation of vanadium in urine of Wistar rats as a function of time after intraperitoneal injection, 71
Circular dichroism
study of the biological effects and DNA damage exerted by a new dipalladium-Hmtpo complex on human cancer cells, 51
Cisplatin
differential genotoxic effects of antitumor *trans*-[$PtCl_2$(*E*-iminoether)$_2$] and cisplatin in *Escherichia coli*, 155
Cofactor biosynthesis
synthesis and characterization of homochiral polymeric *S*-malato molybdate(VI): toward the potentially stereospecific formation and absolute configuration of iron-molybdenum cofactor in nitrogenase, 137
Comet assay
study of the biological effects and DNA damage exerted by a new dipalladium-Hmtpo complex on human cancer cells, 51
Copper(II) complexes
binding abilities of dehydropeptides towards Cu(II) and Ni(II) ions. Impact of *Z*–*E* isomerization on metal ion binding, 106
Covalent binding
studies on the interaction between Cd^{2+} ions and DNA, 85
studies on the interaction between Cd^{2+} ions and nucleobases and nucleotides, 97
Crystal structure
synthesis, crystal structure, antitumor activity and DNA-binding study on the Mn(II) complex of 2*H*-5-hydroxy-1,2,5-oxadiazo[3,4-f]1,10-phenanthroline, 79
synthesis and characterization of homochiral polymeric *S*-malato molybdate(VI): toward the potentially stereospecific formation and absolute configuration of iron-molybdenum cofactor in nitrogenase, 137
Cyclosporin A
mitochondrial permeabiltiy transition and cytochrome *c* release induced by selenite, 43

Elsevier Science Inc.
PII: S0162-0134(02)00450-6

Cytochrome *c*
mitochondrial permeabiltiy transition and cytochrome *c* release induced by selenite, 43
Cytotoxic activity
structure, properties and in vitro cytotoxic activity of hexakis(2-cyanoethyl)ditin(III), 149
Cytotoxicity
study of the biological effects and DNA damage exerted by a new dipalladium-Hmtpo complex on human cancer cells, 51
Damage
studies on the interaction between Cd^{2+} ions and DNA, 85
Dehydropeptides
binding abilities of dehydropeptides towards Cu(II) and Ni(II) ions. Impact of *Z–E* isomerization on metal ion binding, 106
5-Dimethylamino methyl-2-thiouracil
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
Dipalladium complexes
study of the biological effects and DNA damage exerted by a new dipalladium-Hmtpo complex on human cancer cells, 51
DNA
studies on the interaction between Cd^{2+} ions and DNA, 85
studies on the interaction between Cd^{2+} ions and nucleobases and nucleotides, 97
differential genotoxic effects of antitumor *trans*-[$PtCl_2$(*E*-iminoether)$_2$] and cisplatin in *Escherichia coli*, 155
DNA binding
kinetics of reaction of DNA-bound Fe(III)bleomycin with ascorbate: interplay of specific and non-specific binding, 8
DNA cleavage
kinetics of reaction of DNA-bound Fe(III)bleomycin with ascorbate: interplay of specific and non-specific binding, 8
DNA damage
study of the biological effects and DNA damage exerted by a new dipalladium-Hmtpo complex on human cancer cells, 51
DNA-binding interaction
synthesis, crystal structure, antitumor activity and DNA-binding study on the Mn(II) complex of 2*H*-5-hydroxy-1,2,5-oxadiazo[3,4-f]1,10-phenanthroline, 79
Electrothermal atomic absorption spectrometry
binding of vanadate to human albumin in infusion solutions, to proteins in human fresh frozen plasma, and to transferrin, 38
E–Z isomers
binding abilities of dehydropeptides towards Cu(II) and Ni(II) ions. Impact of *Z–E* isomerization on metal ion binding, 106
Ferritin
investigation of the release of iron from ferritin by naturally occurring antioxidants, 18
Fractionation
fractionation of vanadium in urine of Wistar rats as a function of time after intraperitoneal injection, 71
Gel electrophoresis
studies on the interaction between Cd^{2+} ions and DNA, 85
Heart tissue
oxidative stress in toadfish (*Halobactrachus didactylus*) cardiac muscle. Acute exposure to vanadate oligomers, 159
HPLC
studies on the interaction between Cd^{2+} ions and nucleobases and nucleotides, 97
Human albumin
binding of vanadate to human albumin in infusion solutions, to proteins in human fresh frozen plasma, and to transferrin, 38
Human fresh frozen plasma
binding of vanadate to human albumin in infusion solutions, to proteins in human fresh frozen plasma, and to transferrin, 38
2*H*-5-Hydroxy-1,2,5-oxadiazo[3,4-f]1,10-phenanthroline
synthesis, crystal structure, antitumor activity and DNA-binding study on the Mn(II) complex of 2*H*-5-hydroxy-1,2,5-oxadiazo[3,4-f]1,10-phenanthroline, 79
$H^{32}PO_4^{2-}$ radiotracer
three kinetically different inorganic phosphate entities in bovine casein micelles revealed by isotopic exchange method and compartmental analysis, 61
Iron
investigation of the release of iron from ferritin by naturally occurring antioxidants, 18
Isomerization
binding abilities of dehydropeptides towards Cu(II) and Ni(II) ions. Impact of *Z–E* isomerization on metal ion binding, 106
Isomerization process
on the lability of dimethylsulfoxide (DMSO) coordinated to the {Ru^{II}–NO^+} species: X-ray structures of *mer*-[$RuCl_3(DMSO)_2(NO)$] and *mer*-[$RuCl_3(CD_3CN)(DMSO)(NO)$], 144
Kinetic studies
investigation of the release of iron from ferritin by naturally occurring antioxidants, 18
Kinetics
kinetics of reaction of DNA-bound Fe(III)bleomycin with ascorbate: interplay of specific and non-specific binding, 8
Malate
synthesis and characterization of homochiral polymeric *S*-malato molybdate(VI): toward the potentially stereospecific formation and absolute configuration of iron-molybdenum cofactor in nitrogenase, 137
Malic acid
synthesis and characterization of homochiral polymeric *S*-malato molybdate(VI): toward the potentially stereospecific formation and absolute configuration of iron-molybdenum cofactor in nitrogenase, 137
Mannich base
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
Metal complexes
solvent effects on the stability of nifuroxazide complexes with cobalt(II), nickel(II) and copper(II) in alcohols, 67
metal complexes of carboxamidrazone analogs as antitubercular agents1. Synthesis, X-ray crystal-structures, spectroscopic properties and antimycobacterial activity against *Mycobacterium tuberculosis* $H_{37}Rv$, 127
Metal ion binding
binding abilities of dehydropeptides towards Cu(II) and Ni(II) ions. Impact of *Z–E* isomerization on metal ion binding, 106
Micellar calcium phosphate
three kinetically different inorganic phosphate entities in bovine casein micelles revealed by isotopic exchange method and compartmental analysis, 61
Mn(II) complex
synthesis, crystal structure, antitumor activity and DNA-binding study on the Mn(II) complex of 2*H*-5-hydroxy-1,2,5-oxadiazo[3,4-f]1,10-phenanthroline, 79
Molybdate(VI)
synthesis and characterization of homochiral polymeric *S*-malato molybdate(VI): toward the potentially stereospecific formation and absolute configuration of iron-molybdenum cofactor in nitrogenase, 137
Natural aldehydes
synthesis, characterization and X-ray structures of new antiproliferative and proapoptotic natural aldehyde thiosemicarbazones and their nickel(II) and copper(II) complexes, 113
Nickel(II) complexes
binding abilities of dehydropeptides towards Cu(II) and Ni(II) ions. Impact of *Z–E* isomerization on metal ion binding, 106

Nifuroxazide
solvent effects on the stability of nifuroxazide complexes with cobalt(II), nickel(II) and copper(II) in alcohols, 67
Nitrogenase
synthesis and characterization of homochiral polymeric *S*-malato molybdate(VI): toward the potentially stereospecific formation and absolute configuration of iron-molybdenum cofactor in nitrogenase, 137
Nitrosyl complexes
on the lability of dimethylsulfoxide (DMSO) coordinated to the $\{Ru^{II}–NO^{+}\}$ species: X-ray structures of *mer*-$[RuCl_3(DMSO)_2(NO)]$ and *mer*-$[RuCl_3(CD_3CN)(DMSO)(NO)]$, 144
Oligomycin
mitochondrial permeabiltiy transition and cytochrome *c* release induced by selenite, 43
Organoditin(III) complex
structure, properties and in vitro cytotoxic activity of hexakis(2-cyanoethyl)ditin(III), 149
Organotin compounds
structure, properties and in vitro cytotoxic activity of hexakis(2-cyanoethyl)ditin(III), 149
Oxidative stress
oxidative stress in toadfish (*Halobactrachus didactylus*) cardiac muscle. Acute exposure to vanadate oligomers, 159
Peptide bond formation
preferential amino acid sequences in alumina-catalyzed peptide bond formation, 1
Permeability transition pore
mitochondrial permeabiltiy transition and cytochrome *c* release induced by selenite, 43
Phosphate exchange
three kinetically different inorganic phosphate entities in bovine casein micelles revealed by isotopic exchange method and compartmental analysis, 61
Phosphoprotein
three kinetically different inorganic phosphate entities in bovine casein micelles revealed by isotopic exchange method and compartmental analysis, 61
Prebiotic
preferential amino acid sequences in alumina-catalyzed peptide bond formation, 1
Proapoptotics
synthesis, characterization and X-ray structures of new antiproliferative and proapoptotic natural aldehyde thiosemicarbazones and their nickel(II) and copper(II) complexes, 113
Protein binding
binding of vanadate to human albumin in infusion solutions, to proteins in human fresh frozen plasma, and to transferrin, 38
Reactive oxygen species (ROS)
studies on the interaction between Cd^{2+} ions and DNA, 85
studies on the interaction between Cd^{2+} ions and nucleobases and nucleotides, 97
Repair
differential genotoxic effects of antitumor *trans*-$[PtCl_2(E$-iminoether$)_2]$ and cisplatin in *Escherichia coli*, 155
Rhodamine 123
mitochondrial permeabiltiy transition and cytochrome *c* release induced by selenite, 43
Ruthenium
on the lability of dimethylsulfoxide (DMSO) coordinated to the $\{Ru^{II}–NO^{+}\}$ species: X-ray structures of *mer*-$[RuCl_3(DMSO)_2(NO)]$ and *mer*-$[RuCl_3(CD_3CN)(DMSO)(NO)]$, 144
Selenite
mitochondrial permeabiltiy transition and cytochrome *c* release induced by selenite, 43
Speciation
fractionation of vanadium in urine of Wistar rats as a function of time after intraperitoneal injection, 71
Stability
solvent effects on the stability of nifuroxazide complexes with cobalt(II), nickel(II) and copper(II) in alcohols, 67
Stereospecific
synthesis and characterization of homochiral polymeric *S*-malato molybdate(VI): toward the potentially stereospecific formation and absolute configuration of iron-molybdenum cofactor in nitrogenase, 137
Structure–activity relationship
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
Thermal analyses
synthesis and characterization of cobalt and nickel chelates of 5-dimethylaminomethyl-2-thiouracil and their evaluation as antimicrobial and anticancer agents, 22
Thiosemicarbazones
synthesis, characterization and X-ray structures of new antiproliferative and proapoptotic natural aldehyde thiosemicarbazones and their nickel(II) and copper(II) complexes, 113
Trace element
fractionation of vanadium in urine of Wistar rats as a function of time after intraperitoneal injection, 71
Transferrin
binding of vanadate to human albumin in infusion solutions, to proteins in human fresh frozen plasma, and to transferrin, 38
trans-Platinum drugs
differential genotoxic effects of antitumor *trans*-$[PtCl_2(E$-iminoether$)_2]$ and cisplatin in *Escherichia coli*, 155
Tuberculosis
metal complexes of carboxamidrazone analogs as antitubercular agents1. Synthesis, X-ray crystal-structures, spectroscopic properties and antimycobacterial activity against *Mycobacterium tuberculosis* $H_{37}Rv$, 127
Ultra trace metal analysis
binding of vanadate to human albumin in infusion solutions, to proteins in human fresh frozen plasma, and to transferrin, 38
Urine
fractionation of vanadium in urine of Wistar rats as a function of time after intraperitoneal injection, 71
Vanadate oligomers
oxidative stress in toadfish (*Halobactrachus didactylus*) cardiac muscle. Acute exposure to vanadate oligomers, 159
Vanadium
binding of vanadate to human albumin in infusion solutions, to proteins in human fresh frozen plasma, and to transferrin, 38
fractionation of vanadium in urine of Wistar rats as a function of time after intraperitoneal injection, 71
X-ray crystal structure
metal complexes of carboxamidrazone analogs as antitubercular agents1. Synthesis, X-ray crystal-structures, spectroscopic properties and antimycobacterial activity against *Mycobacterium tuberculosis* $H_{37}Rv$, 127
X-ray structures
synthesis, characterization and X-ray structures of new antiproliferative and proapoptotic natural aldehyde thiosemicarbazones and their nickel(II) and copper(II) complexes, 113
on the lability of dimethylsulfoxide (DMSO) coordinated to the $\{Ru^{II}–NO^{+}\}$ species: X-ray structures of *mer*-$[RuCl_3(DMSO)_2(NO)]$ and *mer*-$[RuCl_3(CD_3CN)(DMSO)(NO)]$, 144
